

SLICK - CUSTOM PHONES

Why so *SLICK*?

You want to show off how unique you are whenever it's possible. Showing off who we are has been a growing trend... for a long time... And guess what? Nothings changing! The phone you use for many of us has become a statement of the kind of people we are. Sounds silly right?

Well, unfortunately, or not, it's the truth.

Purchasing a new phone can be such a headache, especially when you only get to decide between a few different boring colors and designs. Not to mention, the price tag for high-performance smartphones can drain your wallet pretty quickly.

SLICK smartphones are the ultimate solution to your phone purchasing problems - with infinite colors, patterns, and designs to choose from or create your very own smartphone from scratch.

You design your phone

SLICK phones allow you to design your phone right from the ground up. Choose what you like from our massive selection of colors, patterns, and designs. Or, if you'd like to do things yourself, you can choose any image or pattern you have a photo of, and we'll turn it into a one of a kind smartphone at no extra cost.

Along with designing the look of your phone, you can also customize its performance by sharing with us what you use your phone for - this way you're not paying anything extra for gadgets you'll never use, or missing out on features that you need.

Save money without sacrificing quality

Almost all smartphones are manufactured in the same place, and the prices are generally way too high for most of us to not ask ourselves "is this really worth it?".

SLICK customized smartphones have found a way to hack the smartphone industry and save you money! By cutting out the middleman and using %100 recycled plastics and electronics. You get the same quality smartphone with endless design options for less money than anything else on the market.

Your custom *SLICK* phone will have all the same features of other leading smartphones without the hefty price tag.

A phone you can feel good about owning

Going green is a growing trend, with many of us stepping up to the plate to do our bit for the environment. All our phones are SCS certified and are made from %100 recycled plastics and electronics.

Not only does this mean your phone will be the most inexpensive, it means you have made a huge impact on the growing plastics and unused electronics problems we are facing.

FAQ'S

Your phones are so cheap, how do I know they won't just break down?

Even though our phones are the most inexpensive you can find on the market, they are manufactured with all the same quality parts you'd find in an Iphone or other leading smartphone options.

How do I know your phones are actually made from recycled goods?

All *SLICK* phones are made to meet SCS certifications. The SCS is the world's leading certification for products made from recycled goods. All SCS approved products are listed on their website. Check them out and see just how much of a difference you're making -
